

Index

Subject	New Ref	Title
Administrative issues	ADM	How and why to use the guides?
Status of Guides	001	Preface and status
Contents	002	Index
Legal framework	003	UK construction health and safety overview
Legislation	003.1	Health and safety legislation to consider
Legal duties	004	What designers should know
Management procedures	005	Preparing practice policies
Pre-construction information	007	Design and decision making: the pre-construction information
The construction phase health and safety plan	008	Management of the works: the health and safety plan
The health and safety file	009	Management of post-project information: the health and safety file
Site conditions	SIT	Identifying Site Hazards & Risks
Asbestos	105	Asbestos survey and management
Lead	106	Lead-based paint survey and management
Ground work	GND	Identifying and managing hazards and risks to all aspects of work in the ground at planning and design stages
Excavations	201	Excavations
Construction methods	CON	Identifying Construction Hazards & Risks associated with the conceptual design
Heavy lifting by hand	301	Manual handling and vibration
	301.1	Manual handling information
Heavy lifting by crane	302.1	Crane information
Acoustic	303	Noise management
Erection techniques	304	Erecting structures
Steelwork	305	Erecting steelwork
Temporary structures	306	Temporary works
Working at height	307	Fall prevention by design
Roofing	308	Roof working
Blockwork	309	Concrete blocks
Materials	MAT	Identifying hazards associated with materials and substances, and their use
General materials	401	Hazards associated with materials
Maintenance & repair	MTN	Identifying and managing hazards associated with alterations of any kind to existing structures
Refurbishment	501	Refurbishment
Suspended access	502	Suspended access
Demolition, dismantling and decommissioning	DEM	Identifying the problems that may occur at the end of life of structures
Demolition, dismantling and decommissioning	601	Demolition, dismantling and decommissioning

Life outside the tick box.
